

GREASING AGENT 114

OVERVIEW

Greasing Agent 114 is a powerful release agent for oven bands which avoids burning. It works particularly well for “breaking-in” new bands or to remove strong burns caused by other products.

A highly cost-effective product due to its unique composition, since it can be applied in minimal amounts with maximum effect. Since the lecithin originate from sunflower, it contains no GMO's or allergens. Also available as a palm-free version with the same characteristics as the original product.

Aromatic

USAGE

Very thin layer.
