

Let us introduce

PREMIUM SAFFRON EXTRACTS

WHEN TASTE IS KEY

Our premium saffron extracts are based on genuine selected raw saffron of the highest quality Sargol. The crocus flowers and their pistils are carefully picked by hand. We have chosen to use the delicate part of the pistil called "Negin", which provides a cleaner saffron with whole saffron straws that are visible in the final application.

ARE YOU READY TO STEP UP YOUR SAFFRON GAME?

Bakels is a large-scale manufacturer of high-quality saffron. We source our saffron from the fields of Iran, and for us, only the best saffron is good enough.

We have extensive experience in producing premium saffron extracts for the food and bakery industry. As one of the leading saffron producers, we place great emphasis on the quality and origin of the raw material. We work closely with our saffron supplier with the aim of creating the best products on the market.

Unique taste and colour

Through a unique extraction process, the over one hundred fragrances and aromas that are naturally found in saffron are enhanced, which gives the extracts both intense colour and a natural, rich taste.

LOOKING FOR SAFFRON TO TAKE YOUR PRODUCTS TO THE SKIES?

Did you know that it takes more than 70,000 flowers to make just 0,5 kg of saffron? Being the most expensive spice in the world, saffron adds more than just flavour to a dish. It adds a luxurious, exotic and premium feeling and it takes only a small amount to achieve a complex flavour and eye-catching colour.

BOOST RETAIL FOOD FORMULATIONS WITH A SAFFRON INFUSION

The red gold creates many ideas for applications. Within the retail segment, saffron can certainly give a new taste profile and appearance to dishes in soups, frozen meals, sauces, dips, and dressings. Saffron pairs exceptionally well with chicken, fish, and seafood. Also beef and lamb are a great combination with the subtle exotic aroma and the bright yellow colour.

Of course, saffron is also ideal to use to spice up cakes, cookies, puddings and ice creams. Even saffron-infused beverages, which are a relatively unexplored area, open up to creativity. The possibilities are endless - let us help you take your ideas to new heights!
